Unit Trust investments and Personal Insurance Lines

Years in industry

since 2001

About myself

My belief is that by first enriching the lives of others, I will also be in turned enriched. I take delight in helping my clients increase wealth through proper and time-proven investment strategies and researching market trends. Everyone needs to have some insurances but I do not believe that one should spend too much into insurances, and I would like to help my clients optimize their personal insurances and cut away any excesses so as to maximize their return of investments.
